PROFILE

Passionate Fullstack Developer and Computer Science student with strong skills in building scalable web applications and AI-powered solutions. Experienced in React, Node.js, FastAPI, MongoDB, and machine learning with Python. Eager to solve real-world problems through clean code, innovative thinking, and continuous learning.

WORK EXPERIENCE

- Fake News Detection System (Final Year Project)** JAN 2026 – MAY 2026
- Developing an AI-powered system that detects Tigrigna fake news using NLP techniques and machine learning models.
 - Tech: Python, TensorFlow, NLP, Scikit-learn, Flask, React, SQLite.
 - Responsible for data collection, model training, API development, and web integration.
- Corn Disease Detection System (Mini Project)** 2024 – 2025
- Built a deep learning model to detect corn leaf diseases from images.
 - Tech: Python, TensorFlow, CNN, OpenCV, Flask.
 - Implemented a web interface for image upload and prediction.
- Sheqlee - Freelancing Platform (Internship Project)** 2025-2026
- Developed a fullstack freelancing platform connecting clients and freelancers.
 - Tech: React, Node.js, Express.js, MongoDB, Tailwind CSS.
 - Features: User auth, job posting, bidding, chat, payment integration.

EDUCATION

- BSc in Computer Science and Engineering** 2020 – 2026 (Expected)
Mekelle University, Mekelle Institute of Technology (MIT).
- Maintained a high academic standing with a CGPA of 3.70 / 4.00.
 - Certificate in Fullstack Web Development.
 - Certificate in Machine Learning and Deep Learning.

HOBBIES

- Football
- Reading
- Travelling
- Writing
- Music
- Gaming
