

KIROS ASEFA

Computer Science & Engineering Graduate (Expected 2026)

Email: kiru.katg@gmail.com | Location: Ethiopia

PROFILE

A passionate Computer Science & Engineering student specializing in full-stack development, machine learning, and intelligent systems. Experienced in building real-world projects including AI-based disease detection systems, fake news classification, and real-time web applications.

EDUCATION

BSc in Computer Science and Engineering (Expected 2026) - Mekelle University

TECHNICAL SKILLS

- Frontend: React, Vite, Tailwind CSS - Backend: Node.js, Express.js - Database: MongoDB - Machine Learning: Python, CNN, NLP - Tools: Git, GitHub, Socket.IO, Postman

PROJECTS

Sheqlee Recruiters Platform

Full-stack recruitment platform connecting job seekers and recruiters with authentication, job posting, and profile management.

Personal Portfolio Website

Real-time full-stack portfolio with admin dashboard, contact system, Socket.IO notifications, and email integration.

Fake News Detection System

Machine learning NLP project using classification models to detect fake vs real news articles.

CNN-Based Corn Disease Detection

Deep learning project using convolutional neural networks to identify corn crop diseases from images.

ADDITIONAL EXPERIENCE

- Built multiple academic and personal AI/ML projects - Experience with REST APIs and real-time systems - Strong problem-solving and software development skills

CAREER OBJECTIVE

To secure a software engineering or machine learning role where I can apply my skills in AI, full-stack development, and real-world problem solving while contributing to impactful systems.
